

Limiting media ownership is critical to a democracy. Already I have witnessed over the last few months the ability of the media to manipulate the thoughts of the general public. Less regulation would concentrate that power even more. What is actually needed is the exact opposite of that which is being proposed; we need more regulation.

Allowing cross ownership in the media is NOT in the public interest. The FCC should represent PEOPLE not CORPORATIONS. Please consider what your job entails, not where the money comes from.
